Making great things happen through **collaboration**

In the first three years of the Wessex CP5 Multi-Functional Framework with Network Rail working as One Team we have proven that collaboration makes a difference and enables great things to happen.

DESIGN SUBMISSIONS

1,100
Submissions

70% of design documents submitted in the past 3 years were on or ahead of deadlines

55.5%

were **approved 1st time** with no comments

44%

were **approved 1st time with comments**

98%

improvement in design acceptance rate

0.5% were rejected compared to a non-collaborative environment where the rejection rate is usually around 20-30%

SURVEYS

These are a key part of our works, unlocking all future designs and decisions. Everyone went home safely from all our surveys.

2,000

surveys completed

100,000

hours spent on-site collecting data

TEAM ENGAGEMENT

250 people

Across 5 countries, in 12 locations of the UK, were actively involved in development across Osborne, Network Rail and our Supply Chain

Technology

Was used to overcome geographical obstacles in an efficient and sustainable way

1,600

Development Team Improvement Opportunities

Frequency rate of 2.7 achieved against a target of 2.5

TECHNOLOGY USAGE

We are at the leading edge of Technology and BIM deployment, which is making our surveys and works safer by using technologies to capture information remotely. Streamlining data capture tasks allows us to free up our people to focus on safe and efficient delivery.

20,000

photos logged

1,400

site diaries recorded

55 projects

BIM deployed on 55 projects. 150 people actively engaged in creating and updating BIM data. 45 projects completed to BIM Level 1, 10 Projects completed to BIM Level 2

1,000

hours – time saved through digitalizing paperwork

2,000

quality assurance checks completed

True collaboration can achieve meaningful results
