

PIM Mobile

Our digital solution to support quality management

Guaranteeing Build Quality

The Project Information Management Mobile App (PIM Mobile) supports our Business Objective – ‘to guarantee to our Customers that we will deliver on our promises and be able to evidence that we have done so’.

This digitalised quality recording and snagging solution significantly reduces the administrative workload of the site team and ensures correct information storage.

Becoming a World Class Learning Organisation

Using the same technology on all our projects will help in carrying out more factual data analysis, informing our decision making process more accurately to drive improvement within our business and our supply chain.
